

INDU-TEK DRY MOLY COATING SPRAY

Heavy Duty Dry film Coating of Molybdenum Disulphide

DESCRIPTION

Indu-Tek Dry Moly Coating Spray is a premium quality dry film lubricant, for use in all areas where a high load, dry coated surface is required to eliminate dust and dirt pick up and abrasion.

Indu-Tek Dry Moly Coating Spray utilises bonding agents to stick to the component surface and has very good resistance to water, it will protect components against corrosion in humid and wet conditions.

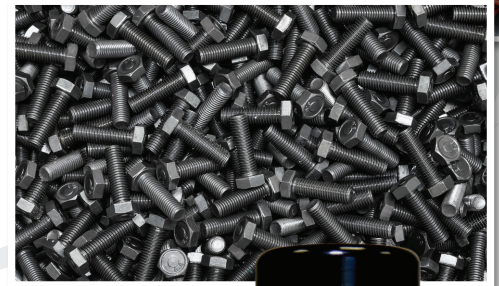

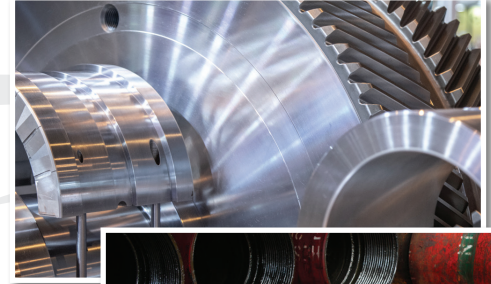

Indu-Tek Dry Moly Coating Spray is heavy duty and will perform where other dry coatings like PTFE & Silicone fail. It's excellent wear and superior load resistance outperforms alternative products when placed under load.

APPLICATIONS

Chains, slideways and gears, all sliding surfaces operating in dry, dusty and abrasive conditions. Also use in areas where conventional wet oils and greases cannot be used. It is ideal as pre-treatment of metal components to help prevent seizure, galling or wear; for use on bolts to give a consistent torque; and for use on threads as an assembly aid or anti-seize. Plain and anti-friction bearings, bushes, slides, gear mechanisms, couplings, cables & winches, taps, hinges, nuts & bolts etc.

FEATURES AND BENEFITS

- Fast bonding and drying, ready to use in minutes
- Dry Film Protects against dust & dirt pick up and abrasion
- Excellent wear and load resistance extend component life
- High solid content of 70%
- Wide temperature range of -50°C to +450°C
- Fully water resistant extends component life and protects against corrosion
- Easy to use Handy Aerosol Spray
